Profile

Junior Full-Stack Developer with hands-on experience building web applications using React, Next.js, TypeScript, Node.js, REST APIs, and MongoDB. Experienced in debugging, working in existing codebases, and integrating frontend and backend functionality through internship experience and full-stack projects.

Work Experience

Website Developer Co-op - DBTK (Philippines) May 2025 - August 2025

- Contributed to an existing Next.js application by implementing UI updates, fixing bugs, and improving responsive behavior across desktop and mobile devices.
- Worked within an established codebase using Git/GitHub, debugging issues and collaborating with the development team to test and deliver application improvements.

Customer Service Representative - Alight (Remote) 2026 - Present

- Support customers with benefits-related inquiries, communicate complex information clearly, create and manage support tickets, troubleshoot issues, and document interactions in a remote environment.

Projects

Serv — Full-Stack Service Marketplace Live Demo | GitHub

Top 5 Entrepreneurship Pitch Finalist — Seneca Polytechnic
Next.js, React, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB

- Selected as a Top 5 finalist in Seneca's Entrepreneurship Work-Integrated Learning Pitch Day and presented Serv to an audience of approximately 100 people.
- Building a two-sided marketplace connecting customers with local service providers, including authentication, service discovery, booking workflows, and database-backed functionality.

Book Shelf — Full-Stack Book Application Live Demo | GitHub

Next.js, React, Node.js, Express, MongoDB, Mongoose, JWT
